

Hood River County Wildfire Resources

Before Wildfire Strikes Guide

This Hood River County guide includes how to prepare your home and woodland property for wildfire, evacuation, emergency communications, and smoke impacts. Scan the QR code to access the guide. Published by OSU Extension.

Defensible Space

Defensible space—a strategically managed area around your home—can be the deciding factor in preventing embers from igniting your property. By acting now, you can help create a fire-adapted community, reducing risks for everyone. Sign up today for a free defensible space assessment from the Oregon State Fire Marshal.

Forestland Fuels Management

The Natural Resources Conservation Service (NRCS) and the Oregon Department of Forestry (ODF) are currently assisting landowners in implementing a series of conservation practices to improve forest resilience on private lands through the Environmental Quality Incentives Program (EQIP). Scan to learn more about the current financial assistance opportunities offered by each agency.

Emergency Preparedness

Learn how to be prepared for an emergency and get the most up to date information from the Hood River County Emergency Management team. Scan for more information.

Evacuation Planning

Are you wildfire ready? Do you have an evacuation plan? Scan for a Wildfire Evacuation Checklist from the Oregon Department of Emergency Management (OEM) to determine what to do during and after an evacuation. Check out OEM's website for additional information on evacuation planning.

Smoke Preparedness

SmokeReadyGorge.org was created to protect your health and prepare for future smoke events. Scan for more information.

Public Lands Fire Info

To stay up to date on fire information, management, and prevention in the Columbia River Gorge National Scenic Area (CRGNSA) and the Mt. Hood National Forest (MHNF), scan for more information.
